

**Soy Infant Formula:  
Safe & Nutritious**

# Great News!

While breast milk is the ideal choice for babies, soy infant formula is a safe and effective alternative source of nutrition for normal growth and development when nutritional needs cannot be met by breast milk or cow milk-based formulas. Soy infant formula provides a lactose-free option for infants with milk allergies.

## Endorsements

The American Academy of Pediatrics and American Academy of Family Physicians endorse the use of soy infant formulas.

## U.S. FDA

The U.S. Food and Drug Administration says that soy infant formulas are safe and acceptable.

## Reassurance

The National Institutes of Health conclude that soy consumption presents no risk to developmental and reproductive health.

424 2ND AVE W • SEATTLE, WA 98119

In fact, parents have fed soy infant formula to more than 20 million infants for more than 30 years. For expert interviews, please contact Craig Handzlik at [Craig.Handzlik@publicis-usa.com](mailto:Craig.Handzlik@publicis-usa.com).
